The large Multi-Touch screen on iPad lets you see web pages as they were meant to be seen — one page at a time. With vibrant color and sharp text. So whether you're looking at a page in portrait or landscape, you can see everything at a size that's actually readable. And with iPad, navigating the web has never been easier or more intuitive. Because you use the most natural pointing device there is: your finger. Scroll through a page just by flicking your finger up or down on the screen. Or pinch to zoom in or out on a photo. There's also a thumbnail view that shows all your open pages in a grid, to let you quickly move from one page to the next.
